`Javascript Node.js MongoDB Bootstrap HTML CSS jQuery`

▸ Layout and development of the data filling form and saving the data in mongodb;

▸ Designing and programming of tooltips for further actions or notification of users about errors in the web application;

▸ Implemented Beautify, and later Prettier, in the project so that reading others' code is not difficult for anyone;

▸ Strictly following the TOR and developing features according to it;

▸ Writing detailed documentation on how to work with the application;

▸ Developed a method for smoothly hiding code blocks to replace a regular display: "none";

▸ Worked individually and in teams with developers, testers and other members of the company.
